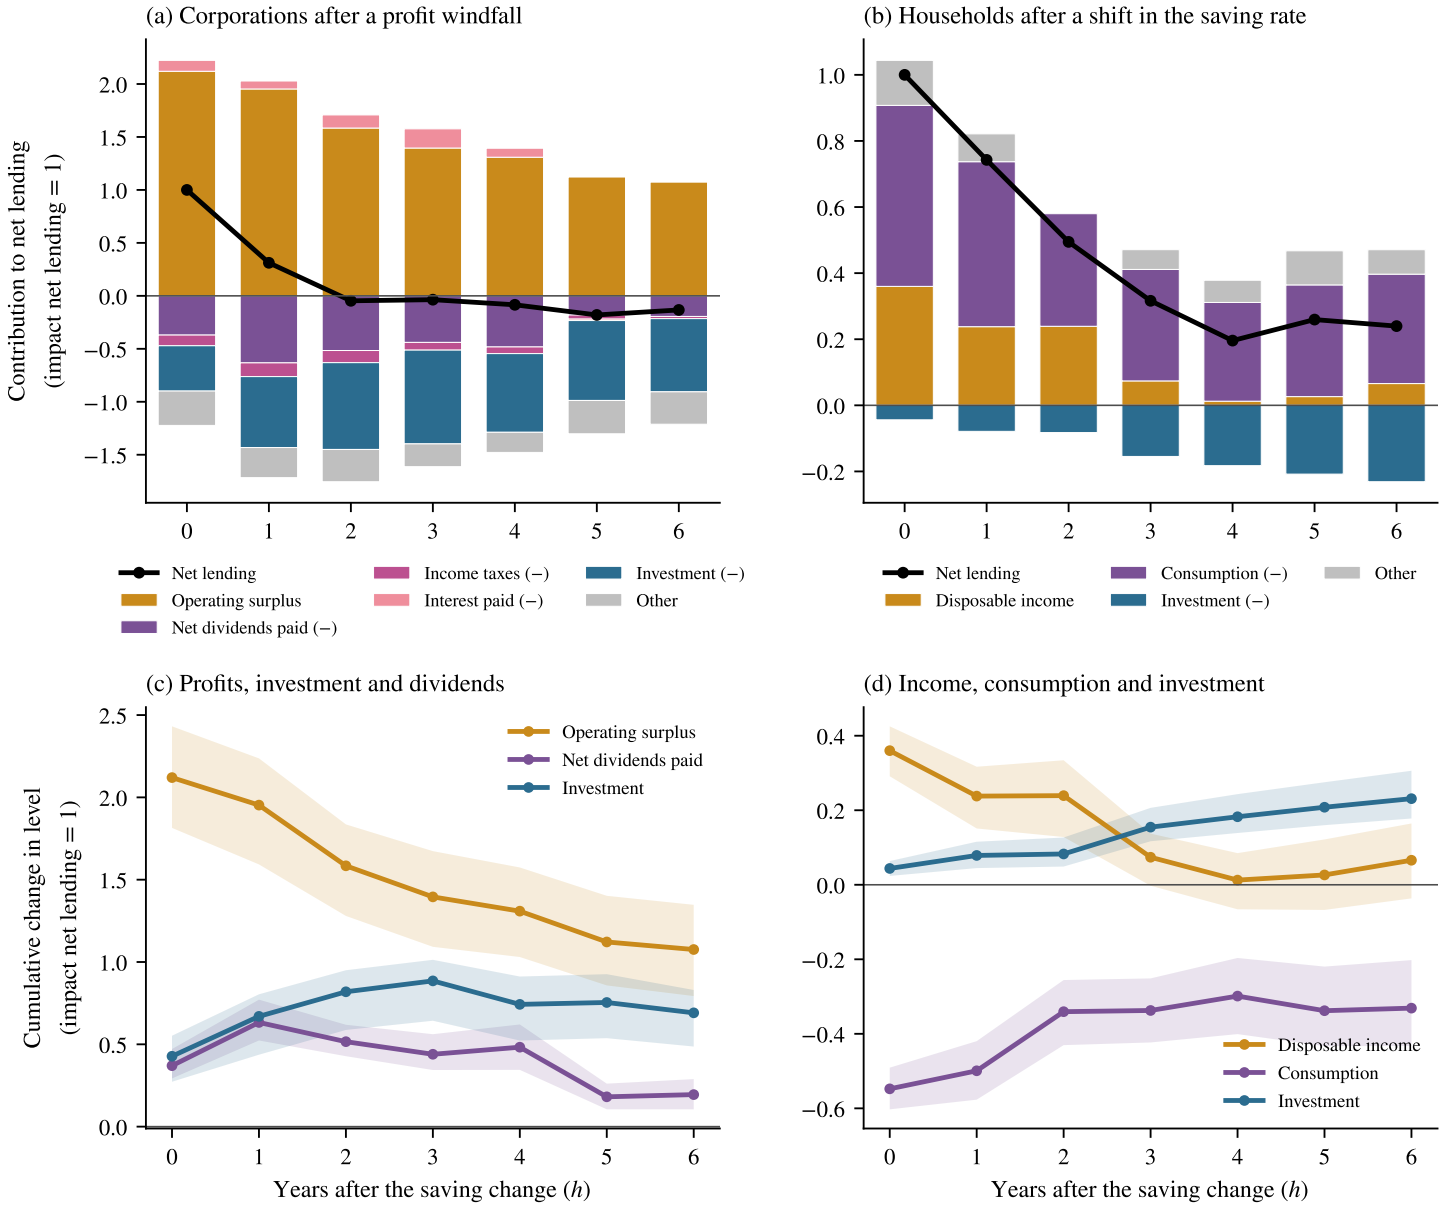
Where the extra saving goes



Notes: Annual data for 38 economies, 1973–2025 (unbalanced). Same local projections as in the main figure, with each item of the sector account (cumulative change from year −1, percent of GNI) as the outcome, scaled by the impact response of the sector's net lending. (a)–(b) Outlays enter with a negative sign; 'Other' is the remainder. (c)–(d) 68 percent bands from a country-cluster bootstrap (999 replications).
